AMENDMENT UNDER 37 C.F.R. § 1.111

Application No.: 09/700,121

Attorney Docket No.: Q61599

Please add the following new Abstract of the Disclosure:

A pallet arrangement intended for one-time use only, includes an upper deck plate,

bottom runners and spacer elements located between the deck plate and the bottom runners and

functioning as pallet feet. The spacer elements include supportive tubular elements which are

fixed in position relative to the deck plate against locking flaps that are folded down around

circular fold lines punched in the deck plate. In turn, the locking flaps are firmly clamped

between the tubular spacer elements and locking tubes that are inserted from above through

openings that were formed in the deck plate by folding down the locking flaps. A method of

manufacturing the pallet is also provided.
